Please delete the present Abstract of the Disclosure, and add the following new Abstract of the Disclosure:

A device for setting vehicle characteristics based upon input from a vehicle driver. A vehicle characteristic selecting/setting portion allows the vehicle driver to set specific vehicle characteristics to arbitrary values. These values are preset during the manufacturing phase, and the vehicle driver is free to adjust the vehicle characteristics as the driver sees fit. Multiple groups of vehicle characteristics can be stored, so that a specific group of characteristics can be selected for given driving conditions.
